Highlights of Changes in 5.0.35.187

ID: 13202 Default set Sync = True for new location.

In this new revision, whenever you have created a new location, the new location will be automatically marked as active location compare to old version where you must go to sync server monitor and active it manually. When you have created the new location, please make sure to close and reopen your sync server monitor for the system to refresh your location list.

ID: 13203 POS Backend now support 64bit.

System now by default will still install on 32bit Folder due to able to support both 32 and 64 bit windows version. To enable 64bit, you have to go to **C:\Program Files (x86)\AutoCount\POS 5.0 Backend** and look for APOSBackEndx64. This is your 64bit launcher and you can create as a new shortcut if you wish to use 64bit.

	APOSBackEnd	15/06/2022 4:54 PM	Application	388 K
	APOSBackEnd.exe	30/11/2020 2:55 PM	CONFIG File	1 K
